

Ministry of Health

State of Kuwait

Statement from the Ministry of Health regarding the Corona disease on Thursday 14/11/2013

Continuing the previous statement, the Ministry of Health in the State of Kuwait confirms today that it has not recorded any New confirmed cases in addition to the two cases that were previously announced yesterday afternoon and are still The cases are under medical care to date, and it should be noted that the two cases are not related and there is no pathological relationship between them, and we point out that all contacts are monitored for both cases daily and no symptoms of the disease were recorded among the contacts of the hospital or the place of residence, and no positive laboratory results were received between the contacts, according to of the technical protocol issued by the Ministry of Health in this regard.

The Ministry of Health stresses the need not to get caught up in the rumors of unreliable information. are true or rumors from unofficial sources and we advise all individuals in the community in ways Prevention of the disease is the following:

- .1 Wash your hands thoroughly with soap and water or substances
The usual antiseptic especially after coughing or sneezing and using cycles
water, before and after handling and preparing foods.
- .2 Use a tissue when coughing or sneezing and covering your mouth and nose
and dispose of it in the garbage can, and if the tissue is not available, it is preferable to cough
Or sneeze on the upper arm and not on the hands.
- .3 Try as much as possible to avoid contact with the eyes, nose and mouth with the hand
After coming into contact with surfaces contaminated with the virus.
- .4 Maintain daily healthy habits such as nutritional balance and activity
Physical and taking adequate sleep, and taking medications regularly for chronic diseases
- .5 Maintaining body hygiene and cleaning of floors and bathrooms
In residential or working places.
- .6 Avoid people with severe respiratory illnesses as much as possible.
